

PRESS RELEASE

HAEFELY HIPOTRONICS Introduces New 40kV Digital DC Hipot

December 14, 2015

HAEFELY HIPOTRONICS introduces the latest addition to our 800PL series DC Hipots with the digital 840PL-DC. This new design boasts the highest output-to-weight ratio of any single-piece DC hipot on the market. The 840PL-DC is controlled by an intuitive, user-friendly interface displayed on a large 7-inch color touchscreen. 840PL-DC users can now program hipot test sequences in Automatic mode or simply control the test voltage using Manual mode. The 840PL-DC is also equipped with data acquisition software for exporting test results via USB. The 840PL-DC is outfitted with extensive safety features including external interlocks, built-in safety checks, visible and audible warning indicators, and an easily accessible emergency stop button to ensure safe operation under all circumstances.

840PL-DC:

- Programmable output voltage, ramp rate, current limit, and dwell timer
- IP67-rated case with wheels and adjustable handle
- 7-inch color touchscreen with intuitive user interface
- Digital metering with Analog or Digital Scales
- Auto-ranging current meter
