**Low amp draw**
- Low ampere draw means a motor that is operating under less load and less electrical stress. This will prolong the motor life and ensure many years of uninterrupted service.

**Superior air flow**
- Certified air flow results tested to AMCA Standards 230 for fan thrust
- Manufactured not assembled Blade and Motor Combination
- Forward or reverse airflow options
- High cubic feet per minute of air delivery minimizes the stress on transformer coils and provides more cooling air during peak load times

**Engineered for outdoor application**
- Unique, locking, labyrinth design between motor housing and impeller guard against moisture entry in the harshest of outdoor applications of high heat and humidity
- IP55 rated and UL 507-39 wash down ready
- UV Stabilized

**Superior class F insulation system for longer motor life**
- Ambient Temperature Range -32°F/-36°C and 104° F/40°C
- Aluminum housing for excellent heat dissipation
- Thermally Protected, single phase standard, three phase optional
- Rated severe duty, TEAO
- Sealed ball bearing in front and rear
- Poly Blades require less torque at start up and reduced in-rush current duration

**Engineered for the world wide transformer industry**
- 50 or 60Hz
- Hot dipped Galvanized OSHA guards
- Standard, Header, Yoke and NEMA frame mounting options
- Conventional and quick connect cord sets

---

**18" Transformer Cooling Fans**

The engineered solution to transformer cooling. More Air • Better Cooling • Longer Life

---

**Backed by a 3 Year Warranty on motor impeller and parts and a 1 Year Warranty on manufacture of grill.**

- Rated severe duty, TEAO
- Sealed ball bearing in front and rear
- Poly Blades require less torque at start up and reduced in-rush current duration

Engineered for the world wide transformer industry
- 50 or 60Hz
- Hot dipped Galvanized OSHA guards
- Standard, Header, Yoke and NEMA frame mounting options
- Conventional and quick connect cord sets
Engineered for outdoor use

- Unique, locking, labyrinth design between motor housing and impeller guard against moisture entry in the harshest of outdoor applications of high heat and humidity
- IP55 rated and UL 507-39 wash down ready
- UV Stabilized

1. Heavy Duty Class European Manufactured Capacitor
2. Stainless Steel Bolts
3. Finned Construction Housing for Superior Heat Disappation
4. OSHA approved Hot Dipped Galvanized Guards
5. Motorshaft completely protected from weather and elements
6. Light-weight, UV Stabilized polymer blades
